ANIJA JONES DANIEL CHANDRA

Senior Business Analyst & Test Lead | Requirements, Process Improvement, SQL, Power BI, AI Enabled Delivery & QA | Banking, Insurance & ERP

Newcastle, NSW • +61-4 1235 6808 • anijajones@gmail.com • LinkedIn: Anija Jones
Skilled Work Regional (Provisional) Visa (subclass 491), valid till 29 April 2031 • Available to start immediately • ISTQB Certified Tester

PROFESSIONAL SUMMARY

- Senior Business Analyst (8 years) and Test Lead (8 years) with 17+ years in the IT industry across banking, capital markets and insurance, combining requirements leadership, process optimisation, test leadership and emerging technology adoption; ISTQB Certified Tester.
- Most recently AVP – Delivery Lead / Business Analyst at Bank of America, owning requirements gathering through BRD/FRD documentation, impact analysis, test scenarios and UAT sign-off for OTC Derivatives, TBA, Fixed Income, and Futures & Options.
- Proven track record analysing existing workflows and identifying opportunities for process optimisation, translating complex business requirements into scalable technical solutions, and directing global cross-functional teams (US, London, India) through large-scale system migrations (120+ components).
- Previously Test Lead at Cognizant (Unum Insurance), defining test approach, estimates and resourcing, running defect triage with onsite/offshore teams, administering test metrics and governance reporting, and building and mentoring a team of 10+ testers; cut testing cycle time by 25% and errors by 30%.
- Extensively applies AI in business analysis to support impact analysis and evaluate emerging technology solutions, exercising strong judgement to review and ensure the correctness of AI-generated output.
- Deep insurance-domain expertise across US and Indian markets (Unum, Allstate, OICL, GMACI), covering life, disability, property and casualty lines, with strong grounding in the full software testing life cycle using Waterfall model.
- Skilled stakeholder manager and mentor, confidently engaging business leaders, developers and executives at all levels; ISTQB-certified with hands-on MS SQL, Agile Scrum and Excel-based data reconciliation experience.

CORE COMPETENCIES

Business Requirements Gathering & Analysis (BRD/FRD) • Test Planning & Test Approach • Process Optimisation & Continuous Improvement • Impact Analysis & Gap Analysis • Functional, System Integration, Regression & UAT • Defect Management & Triage • Create Process Maps • AI Implementation in Business Analysis • Project & Delivery Management • Test Estimation & Resourcing • Test Metrics & Governance Reporting • Stakeholder & Client Communication • Workshop Facilitation • Agile Scrum (Jira Epics/Stories) • Effort Estimation • Risk Assessment & Regulatory Reporting • Test Data Management • Data Reconciliation & Validation • Team Leadership & Mentoring • Knowledge Transition

TECHNICAL SKILL SET

- Databases: MS SQL Server, Oracle, IBM DB2 — gap analysis, and verifying tables, views and stored procedures
- Tools: Jira, Confluence, Power BI, Quality Center (QC), Bugzilla, Microsoft Test Manager, HP QuickTest Professional (QTP)
- Configuration Management: Windows SharePoint, Visual Source Safe, SharePoint, Tortoise SVN
- Platforms: Windows 11/10
- Microsoft Office (Word, Excel – formulas, pivots, slicers, data recon models, PowerPoint, Visio)
- .NET, Java applications testing and requirements

PROFESSIONAL EXPERIENCE

AVP – Delivery Lead, Project Management | Business Analyst

B.A. Continuum India Pvt. Ltd. (Bank of America), India — Collateral Technology (GCDW & CRT) | Sep 2018 – Sept 2026

- Partnered with Operations users to gather and analyse business requirements, authoring BRDs and FRDs used by developers to design and enhance system functionality.

- Led end-to-end collateral development for new business lines — OTC Derivatives, TBA, Fixed Income, and Futures & Options — directing the Reference Data team on sourcing, standardisation and delivery via APIs, feeds and UI screens.
- Analysed existing workflows and business processes, performing impact analysis and SQL-based gap analysis to identify opportunities for process optimisation, and built Excel data-reconciliation models to validate system changes against expected output.
- Extensively used AI in performing impact analysis and business analysis, evaluating and applying AI-enabled approaches to improve business outcomes. Applied strong judgement to review and ensure correctness of the AI-generated output.
- Oversaw global project teams across the US, London and India using Agile Scrum (Sprint Planning, stand-ups, Jira Epics/Stories), managing scheduling, budgeting and resourcing.
- Managed large-scale migration projects spanning 120+ components; coordinated UAT with business users, ran deliverable walkthroughs and obtained formal sign-off.
- Synthesised business requirements from users, improving system performance by 20%; provided technical and process guidance to other BAs on the team.
- Analysed and evaluated existing business processes and proposed appropriate business solutions to the problem statement, collaborating with delivery teams to ensure proposed solutions aligned with business needs.
- Created Functional Requirement Documents and provided walkthroughs to the developers who designed and developed/enhanced the system software.
- Worked extensively on Agile methodology to create Jira Epics and Stories to track deliverables; expertise in writing User Stories/Jira Stories.
- Expertise using SQL queries to identify gaps or data quality issues in the system and to analyse new business requirements.
- Determined effort/cost estimates for enhancements and defined project plans using project management methodologies, principles and techniques.
- Facilitated Sprint Planning meetings to review sprint milestones and discuss changes planned for the sprint, engaging stakeholders through discovery-style discussions.
- Acted as a central reference in clarifying queries raised by the development team so that business requirements were met, engaging confidently with stakeholders across business and technology teams.
- Prepared/reviewed test scenarios and test cases corresponding to business requirements; guided the team in automating test cases using Playwright with Copilot.
- Performed/guided the team in functional testing, system integration testing and regression testing, as applicable.
- Expertise in Change Management Process, supporting the implementation and adoption of new processes and technologies through effective stakeholder engagement.
- Worked with business users to create test scenarios and set up test data during User Acceptance Testing.
- Built data reconciliation models using MS Excel, performing data reconciliation between model and code-generated data to validate the changes made.
- Created presentations and user manuals, process maps and documented business processes for business users, and walked them through new system functionality.

Senior Associate – Projects (Test Lead)

Cognizant Technology Solutions, Chennai, India — Client: Unum Insurance | Jul 2014 – Aug 2018

- Led the Benefits Infrastructure Upgrade as Test Lead, defining the test approach (Lift-and-Shift, Re-factor, Re-engineer), effort estimates and resourcing across the upgrade scope; ran governance reporting and risk assessments for stakeholders.
- Created and implemented system test plans and exit criteria, planned the testing timeline, allocated workforce and defined roles and responsibilities.
- Guided the team in test planning, design, execution and defect management, reviewing test scenarios, test cases and results, and triaged defects with the offshore development team, tracking them to closure.
- Facilitated defect-triage sessions with onsite/offshore teams, administered test metrics, and reduced errors by 30%.
- Directed Test Data Management for Unum's Disability Insurance platform, automating test data provisioning (HP Quality Center, QTP) for a 5-person team and cutting defect turnaround.
- Created training documents and cross-trained the team on new functionality; prepared status reports and a monthly governance deck, and walked the customer through test deliverables to obtain sign-off.

Associate Project Manager

Indium Software (India) Ltd., Chennai, India | Apr 2014 – Jul 2014

- Managed concurrent projects — Konverge ERP, ShipPalm (Synergy Maritime) and Extramarks Education — leading test strategy, task allocation and delivery across teams of 3–5.
- Guided web and software testing efforts, ensuring adherence to best practices and delivering milestones on schedule.

Earlier Career: Test Lead, Indium Software (India) Ltd. (Apr 2011 – Oct 2012) | Project Engineer, Wipro Technologies (Sep 2007 – Mar 2011)

- Test Lead, Indium (2011–2012): planned testing for Engineering, Fire and Rural Insurance products, estimated effort, reviewed test scenarios and test cases, performed RCA on withdrawn defects and maintained defect metrics.

KEY PROJECTS & DOMAIN EXPERIENCE

- GCDW & CRT Regulatory reporting projects & Reference Data projects in Banking Domain (Collateral Technology) – End to end project delivery - Business Analysis including Requirements discussion to delivery.
- Y2K Remediation & Polaris Upgrade Programs, Cognizant — project management, test planning and risk escalation across Disability Insurance platform upgrades.
- Event Management System, Dean Evans & Associates (Test Lead, 2012) — Event Management System; Team Management, Software Testing Methodologies, client status reporting and root-cause analysis on defects.
- OICL Due Diligence, 3i Infotech (Senior Test Engineer, 2011) — Indian general insurance: proposals, endorsements, claims, reinsurance/co-insurance testing for Fire & Engineering products.
- Claims Technology Solutions, Wipro Technologies (2008–2011), Client: Allstate Insurance — US claims platform: test approach, scripts and peer reviews using HP Quality Center.

SELECTED ACHIEVEMENTS

- Reduced testing cycle time by 25% and boosted product quality through innovative, streamlined testing methodologies.
- Enhanced system uptime by refining testing protocols, ensuring consistent, minimal-downtime project delivery.
- Cut project expenses by 15% via cost-effective testing strategies while maintaining high-quality standards.
- Built and mentored a high-performing team of 10+ testers, driving professional development and operational excellence.

EDUCATION & CERTIFICATION

- Master of Business Administration – Financial Services Management, Anna University, Chennai, India (Feb 2012)
- Bachelor of Engineering (Electrical & Electronics Engineering), Jeppiaar Engineering College – Anna University, Chennai, India (Apr 2007, **University Rank 41**)
- ISTQB Certified Tester – Foundation Level, Certificate Number ITB-CTFL-0028902 India (21st May 2010)
